The Essential Business-To-Business Islamic Finance Forum

The dynamic Islamic investment and financial management market is growing at the rate of 15% per annum, currently operates in approaching 75 countries and accounts for around US\$200 billion.

Competing with a monolithic conventional industry, professionals in Islamic financing must streamline procedures, develop new and innovative products and maintain leading edge technology. Only by keeping pace with a fast growing, modern market can Islamic institutions and instrument providers ensure they stay ahead and thrive.

Islamic finance is a global industry and IIR, in association with Dow Jones Indexes and iHilal, have put together a distinguished Forum of pioneering international policy makers and business leaders to bring you the latest trends in the world's fastest growing financial sector.

For a global perspective and forward-thinking solutions to philosophical concerns, the International Islamic Finance Forum is the essential business-to-business conference and the first of its type in the region.

"The scale of the Islamic banking system won't become attractive until the Islamic banks move more quickly to take opportunities in the market. In this day and age, if you can't turn around a transaction in two or three months, you're slow."

Mahmoud Difrway, ME Managing Director,
Chase Manhattan

"Islamic investors are as sophisticated as any other. As an investment animal they are no different. They want a good return."

Mushtak Parker, Editor
Islamic Banker
